Contents Volume 165

1 Location analysis: A synthesis and survey
C.S. ReVelle and H.A. Eiselt
20 Minimizing total completion time and total deviation of job completion times from a restrictive due-date
G. Mosheiov
34 Solving the flowshop scheduling problem with sequence dependent setup times using advanced metaheuristics
R. Ruiz, C. Maroto and J. Alcaraz
55 Combining evolutionary computation and dynamic programming for solving a dynamic facility layout problem
T. Dunker, G. Radons and E. Westkämper
70 Improved results on the 0–1 multidimensional knapsack problem
M. Vasquez and Y. Vimont
82 Optimal timing of a sequence of tasks with general completion costs
F. Sourd
97 The shortest path problem with forbidden paths
D. Villeneuve and G. Desaulniers
108 Optimal inventory policies for an economic order quantity model with decreasing cost functions
H. Jung and C.M. Klein
127 Multi-product lot-sizing with a transportation capacity reservation contract
L. van Norden and S. van de Velde
139 An experimental analysis of solution performance in a resource sharing and scheduling problem
S. Samaddar, G. Rabinowitz and G.P. Zhang
157 Global plant capacity and product allocation with pricing decisions
A.K. Chakravarty
182 Outbound supply chain network design with mode selection, lead times and capacitated vehicle distribution centers
E. Eskigun, R. Uzsoy, P.V. Preckel, G. Beaujon, S. Krishnan and J.D. Tew
207 Inventory pooling of repairable spare parts with non-zero lateral transshipment time and delayed lateral transshipments
H. Wong, D. Cattrysse and D. Van Oudheusden
219 Knowledge-based framework for automated dynamic supply chain configuration
S. Piramuthu
231 A two-bottleneck system with binomial yields and rigid demand
A. Grosfeld-Nir
251 Incomplete information and multiple machine queueing problems
M. Mitra

doi:10.1016/S0377-2217(05)00047-0

267 Index policies for the maintenance of a collection of machines by a set of repairmen
K.D. Glazebrook, H.M. Mitchell and P.S. Ansell

285 Editorial: Project management and scheduling
V. Valls and J. Weglarz
289 Project scheduling under uncertainty: Survey and research potentials
W. Herroelen and R. Leus
307 On the fallacy of averages in project risk management
S.E. Elmaghraby
314 Maximization of solution flexibility for robust shop scheduling
C. Artigues, J.-C. Billaut and C. Esswein
329 Simple probability models for project contracting
A. Paul and G. Gutierrez
339 Network decomposition-based benchmark results for the discrete time–cost tradeoff problem
C. Akkan, A. Drexl and A. Kimms
359 New computational results for the discrete time/cost trade-off problem with time-switch constraints
M. Vanhoucke
375 Justification and RCPSP: A technique that pays
V. Valls, F. Ballestín and S. Quintanilla
387 An introduction to multi-parameter complexity analysis of discrete problems
S.V. Sevastianov
398 Complexity results for flow-shop problems with a single server
P. Brucker, S. Knust and G. Wang
408 The two-machine flow-shop problem with weighted late work criterion and common due date
J. Błażaewicz, E. Pesch, M. Sterna and F. Werner
416 Positive half-products and scheduling with controllable processing times
A. Janiak, M.Y. Kovalyov, W. Kubiak and F. Werner
423 Single machine scheduling to minimize total weighted tardiness
T.C.E. Cheng, C.T. Ng, J.J. Yuan and Z.H. Liu
444 Minimizing non-decreasing separable objective functions for the unit-time open shop scheduling problem
T.C.E. Cheng and N.V. Shakhlevich
457 Makespan minimization for scheduling unrelated parallel machines: A recovering beam search approach
M. Ghirardi and C.N. Potts
468 Scheduling UET-UCT outforests to minimize maximum lateness
G. Singh
479 A comprehensive review and evaluation of permutation flowshop heuristics
R. Ruiz and C. Maroto
495 Scheduling of continuous and discontinuous material flows with intermediate storage restrictions
K. Neumann, C. Schwindt and N. Trautmann
510 Continuous filling and emptying of storage systems in constraint-based scheduling
F. Sourd and J. Rogerie
525 A heuristic to schedule flexible job-shop in a glass factory
R. Alvarez-Valdes, A. Fuertes, J.M. Tamarit, G. Giménez and R. Ramos
535 Evolutionary algorithms for periodic arc routing problems
P. Lacomme, C. Prins and W. Ramdane-Chérif

555 Polynomial approximation algorithms with performance guarantees: An introduction-by-example
M. Demange and V.Th. Paschos
569 Applying the minimax criterion in stochastic recourse programs
M. Riis and K.A. Andersen
585 Multiobjective second-order symmetric duality with *F*-convexity
X.M. Yang, X.Q. Yang, K.L. Teo and S.H. Hou
592 Symmetric duality in multiobjective programming involving generalized cone-invex functions
S. Khurana
598 Stabilization of Mehrotra's primal–dual algorithm and its implementation
P.S. Stanimirović, N.V. Stojković and V.V. Kovačević-Vujčić
610 Distribution network design: New problems and related models
D. Ambrosino and M.G. Scutellà
625 Partial convexification cuts for 0–1 mixed-integer programs
H.D. Sherali, Y. Lee and Y. Kim
649 A graph-oriented approach for the minimization of the number of late jobs for the parallel machines scheduling problem
C.T. Bornstein, L.F. Alcoforado and N. Maculan
657 A heuristic algorithm for the truckload and less-than-truckload problem
C.-W. Chu
668 Vehicle minimization for periodic deliveries
A.M. Campbell and J.R. Hardin
685 A Bayesian approach for assessing process precision based on multiple samples
W.L. Pearn and C.-W. Wu
696 Entropy as a measure of operational flexibility
E. Shuiabi, V. Thomson and N. Bhuiyan
708 The shift team formation problem in multi-shift manufacturing operations
J. Slomp and N.C. Suresh
729 A dynamic joint replenishment policy with auto-correlated demand
L.H. Lee and E.P. Chew
748 An inventory model for delayed customization: A hybrid approach
R.S. Tibben-Lembke and Y. Bassok
765 Optimal stopping problem with double reservation value property
B.-K. Kang
786 Minimal standby redundancy allocation in a *k*-out-of-*n*:F system of dependent components
V. da Costa Bueno
794 Finite buffer polling models with routing
S.E. Grasman, T. Lennon Olsen and J.R. Birge
810 Componentwise bounds for nearly completely decomposable Markov chains using stochastic comparison and reordering
N. Pekergin, T. Dayar and D.N. Alparslan
826 Robustness of Kriging when interpolating in random simulation with heterogeneous variances: Some experiments
J.P.C. Kleijnen and W.C.M. van Beers
835 Technical note – On optimization approach for multidisk vertical allocation problems
J.-F. Tsai and H.-L. Li
843 On the single machine total tardiness problem
Z.J. Tian, C.T. Ng and T.C.E. Cheng
847 Contents Volume 165
